2. LICENSING SCHEMES AND GEOGRAPHIC SCOPE

2.1 GENERAL RULES

Licenses for the Licensed Programs to which this OST applies may be granted according to one of the following licensing schemes (specifying the authorized use), as specified in the Product Portfolio if available, and as determined in the applicable Transaction Document:

- Concurrent (or Floating) Based
- System License
- Token Based

Licensed Programs may be accessed and executed by Users whose usual workplace is at the same facility as the License Server(s) (1) on the License Server(s) itself/themselves, and (2) on other Machines that are networked to the License Server(s) at the same site as the License Server(s) or, if identified in the Transaction Document, in the same country as the License Server. Within the parameters of the Transaction Document, subject to the restrictions described in this OST, Customer may from time to time designate the License Server(s) for which license keys shall be provided and from which tokens shall be available to other Machine(s). Customer shall promptly provide 3DS with usage reports when requested.

In addition, Users, whose usual workplace is located in the same country as the country where such use of the Licensed Programs has been authorized, may use the Licensed Programs in any other country (subject inter alia to the export and re-export laws and regulations provisions of the Agreement) for purposes of a business trip of a maximum of thirty (30) consecutive days.

It is agreed that, notwithstanding anything to the contrary provided in the Documentation, software components packaged and delivered by 3DS as part of a given 3DS Offering:

- shall solely be used together and as part of such 3DS Offering and
- shall not be used standalone and/or for other purposes than the ones for which such 3DS Offering has been marketed and granted to Customer by 3DS.

If a patent invention is implemented in the 3DS Offering for which a right to use or access is granted pursuant to the Agreement, 3DS hereby grants Customer a non-exclusive license on the applicable patent limited to the use of such 3DS Offering.

2.2 SPECIFIC PROVISIONS FOR CERTAIN 3DS OFFERINGS

Number of tokens

For execution of Isight simulation workflows, the number of required tokens is determined by the number and type of components in the simulation workflow and the number of processor cores used in running the simulation workflow. In case of a new license or renewal of any 3DS Offering, the required number of tokens may be changed in the event of modifications to such 3DS Offering. Customer will receive a license key for each License Server that will permit access to the 3DS Offering. License keys include the agreed number and type of tokens for the 3DS Offering. The 3DS Offering, license tokens and applicable fees are specified in the Transaction Document.

Concurrent Based license

Each 3DS Offering licensed in Concurrent Based mode requires a unique license feature for each concurrent use of the 3DS Offering. Customer will receive a license key for each License Server that will permit access to the 3DS Offering(s).

System License

SIMULIA Abaqus models with “site” in the product name utilize a System License. Geographic locations where System Licenses may be used are specified in the applicable Agreement and Transaction Document.

3. OTHER PERMITTED USES FOR 3DS OFFERINGS

In any event, Customer may not (1) use the Licensed Programs to develop software code for (i) general distribution by any means, and whether alone or bundled or delivered with any product, data, information, software, or other element, or (ii) any services that do not add value attributable to the intervention of specific human skills, such as, without limitation, in a data services operation or as an application service provider, or (2) install and/or operate and/or give access to the Licensed Programs on any hardware and/or software environment owned by or under control of any third party unless otherwise expressly authorized in the Agreement, or (3) represent or imply to any party that it is an authorized or certified provider of services for 3DS. Except for components mentioned in the section EXCLUSIONS below, the warranty and indemnification provided by 3DS under the Agreement apply to all open source software components and shall be provided by 3DS and not by the original licensor, but only for the use of the 3DS Offerings that is in compliance with the terms of the Agreement, and in conjunction with the 3DS Offerings.
